

AFFORDABLE CYBERSECURITY

THREAT DETECTION & RESPONSE

24/7 SECURITY OPERATIONS CENTER

Our Security Operations Center (SOC) investigates any alerts on your network, and escalates real incidents to eliminate threats.

INTERGRATED, AUTOMATED BUSINESS PROTECTION

Security Incident and Event Management (SIEM) technology provides a holistic picture of your environment thru intergrations with your current hardware and software providers.

LOW INVESTMENT COST

Threat monitoring with low investment and rapid implementation, means that even small business can protect themselves from cybersecurity threats.

ABOUT FOGO SIEM

With FOGO Solutions, you can rest assured that your most crucial information and technological assets are accessible and protected and now thru our Security Incident and Event Management (SIEM) technology we offer a threat detection and response platform backed by an in-house Security Operations Center (SOC) that is co-managed and compliant. Our threat detection software is built to be flexible and to integrate with popular software like Microsoft 365, G Suite, Salesforce, Slack, & Cisco for a holistic picture of your environment. Super-fast implementation with an attractive price tag means that business of any size can invest in the protection they need.
