

WEBSITE BUILD & HOSTING

We offer a range of customized, SEO-conscious web design and graphic design services. Good web design and graphics are essential for recognition. Our team is skilled at developing websites and graphics that will become synonymous with your business! We also offer website hosting and on-demand maintenance!

Planning

We work directly with our clients to gather information, creative ideas and to develop a brand. What do you want your site to look like? Who is your audience? What are you providing or selling? When does the site need to launch?

Launching

After your website is complete, it is ready for launch. We will create a sitemap, analyze the SEM and SEO, check for errors and make sure your pages load quickly. After launch, we will maintain your site's health and readiness. We also offer ongoing SEO services to keep your business and website visible at the top of search results!

Staging

After we have a plan, we begin to work on a wireframe, or a rough sketch of the website. The wireframe is a tool to plan the design, pages, etc. before adding content.

Creating

When planning and staging are complete, we can begin to insert content into the front and back ends of your site. This step of the process is the most time-consuming, but ensures that your website is functional, appealing, educational and SEO friendly.
